

# BACHELOR THESIS – Drug Delivery „Literature Research Liposomes“

## Our Vision

- Getting an injection is a very unpleasant experience
- We are working on a biotechnological production process
- Our technology allows oral delivery of drugs which currently have to be administered via injections
- This technology has been successfully tested for vaccination, treatment of diabetes, cancer, etc.
- After upscaling we will potentially commercialize our product

**We develop a bioprocess that enables oral drug deliver**

## We Want You!

- Biotechnology, Chemistry, Pharmacy, Medical Studies or similar background
- Interest in drug delivery and innovative technologies
- Motivated Bachelor student
- Independent and structured
- Interest in Literature research

**Bachelor thesis for 2 months starting now**

## We Offer

- Applied research – no basic science
- Solve an industrially relevant problem
- No time delay due to the pandemic situation
- Work (partially) from home
- Learn how to present your results at meetings

**Be part of a motivated young team with entrepreneurial spirit**

**NovoArc**
